

GLOW•LAB

Platform Proposal

Path 3 · AI-tool path · RMA Group Project

A wellness retail platform built around your goals, not product categories.

01 Who we are	02 Who we target	03 Our USP	04 Product combos
05 Platform features		06 How it works	

GlowLab — Platform identity

We are an independent online wellness retailer. Unilever launches the product line. We design the retail experience. Think Sephora for holistic health.

Our Role Independent retail platform. We control the customer experience, product presentation, and community. Unilever is our brand partner, not our employer.	Our Brands Nutrafol Hair & skin supplements OLLY Mood & women's health Liquid I.V. Hydration & energy	Our Model Sell complete routines, not single products. Every bundle combines all three brands — increasing basket value for Unilever and results for the customer.
--	---	---

Closest real-world analogy: Sephora × iHerb × Goop — Sephora’s retail experience, iHerb’s supplement depth, Goop’s lifestyle positioning. None of them do all three.

Three core customer personas

A common thread across all three: overwhelmed by choice, under-served by existing retail. They don't want to visit four websites — they want one trusted platform that builds their routine for them.

Sarah, 27

Marketing exec, London

Skin concerns · Hair loss · Stressed

"I want clearer skin and my hair to stop falling out — but I don't know where to start or what actually works."

Maya, 32

New mum, part-time work

Low energy · Sleep issues · Hormones

"I'm exhausted all the time and my hormones feel off. I need something simple that fits into my routine."

Jess, 24

Student, health-conscious

Wellness curious · Budget aware

"I want to start taking better care of myself but I don't want to spend hours researching. Just tell me what to take."

What makes GlowLab different

No competitor combines goal-based retail + AI personalisation + cross-category bundling + lifestyle community in one platform.

Goal-based shopping

Products organised by outcome — “stronger hair”, “glowing skin” — not by supplement / skincare / food category. First retailer to do this across all wellness categories.

AI personalisation

Quiz + advisor removes decision paralysis. You get a specific routine with a reason — not a generic bestseller list.

Cross-category bundling

Every bundle blends supplements + skincare + nutrition. One purchase covers your whole routine and grows Unilever’s basket across all three brands.

Lifestyle community

Users share routines and results — not star ratings. Creates identity and loyalty that competitors can’t copy overnight.

Science-backed trust: Nutrafol is clinician-formulated. Every bundle includes an AI-written “why this works” explanation grounded in ingredient science.

Five goal-based bundles

Every bundle follows the same logic: one core treatment (Nutrafol), one daily supplement (OLLY), one functional drink (Liquid I.V.). All three Unilever brands in every purchase.

Stronger Hair & Nails Most popular

 **Nutrafol Women's Hair Growth** — Core treatment — targets root cause of hair loss

 **OLLY Women's Multi** — Daily foundation — biotin, vitamin D, folate

 **Liquid I.V. Hydration** — Supports nutrient absorption

Why this works: Hair loss is often hormonal and nutritional. Nutrafol targets the root cause, OLLY fills daily gaps, Liquid I.V. ensures absorption.

Clear Glowing Skin Trending

 **Nutrafol Skin Supplement** — Core treatment — targets acne root cause internally

 **OLLY Glowing Skin Gummies** — Hyaluronic acid + collagen support

 **Liquid I.V. Hydration** — Skin hydration from the inside out

Why this works: Clear skin starts with gut and hormone balance. Nutrafol addresses this internally while OLLY and Liquid I.V. support hydration.

Sleep & Stress Relief New mums

 **OLLY Sleep Gummies** — Melatonin + L-Theanine + botanicals

 **OLLY Stress Gummies** — Ashwagandha + GABA for calm

 **Liquid I.V. Sleep** — Melatonin-infused hydration multiplier

Why this works: Stress and sleep are deeply linked. OLLY targets both while Liquid I.V. Sleep combines hydration with melatonin for a bedtime ritual.

Daily Energy & Focus Desk workers

 **Liquid I.V. Energy Multiplier** — Matcha + guayusa + B vitamins — clean energy

 **OLLY Women's Multi** — Iron + B12 for sustained energy

 **Nutrafol Hair (maintenance)** — Stress-related hair protection

Why this works: Desk-based fatigue is often iron and B-vitamin deficiency. OLLY and Liquid I.V. cover this, while Nutrafol protects against stress-related hair loss.

🌸 **Women's Hormone Health** **Bestseller**

🦋 **Nutrafol Women's Balance** — Hormone-targeted hair and skin formula

🍬 **OLLY Women's Multi + PMS Relief** — Full hormonal cycle support

💧 **Liquid I.V. Hydration** — Daily nutrient delivery

Why this works: Hormonal fluctuations affect hair, skin, mood and energy simultaneously. This bundle addresses all four with one daily routine.

What the AI system actually does

AI Quiz 3 questions: goal + lifestyle + concern. Output: personalised bundle + one-line reason per product. Under 2 minutes.	AI Advisor In-site chatbot answers: “Is this safe to combine?” / “How long for results?” Grounded in product data only.	Routine Builder Builds a morning + evening ritual based on quiz results. Tells you what to take, when, and why.	Community Users share routines and real results — not star ratings. Topic tags: #HairGrowth #SkinFromWithin
--	--	---	--

Quiz logic — how inputs map to bundles

Quiz input	Bundle recommended
Hair loss + stressed + desk job	 Stronger Hair & Nails
Breakouts + hormones + active lifestyle	 Clear Glowing Skin
Low energy + bad sleep + busy	 Sleep & Stress Relief
Fatigue + desk-based + need focus	 Daily Energy & Focus
Hormonal changes + cycle concerns	 Women's Hormone Health

What AI does - Personalise product recommendations based on goals - Explain why each product was chosen - Answer ingredient and compatibility questions - Build morning and evening routine schedules - Adjust routine based on 4-week check-in	What AI does NOT do - Replace medical advice or diagnose conditions - Guarantee specific health outcomes - Fabricate data not in the product database - Make claims beyond Unilever's product science <i>Always recommends consulting a doctor for medical concerns.</i>
--	--

End-to-end user journey

Every step is designed to reduce friction and build trust — from first visit to loyal repeat customer.

1	Land Homepage — lifestyle hero section, “Find my routine” CTA. First impression: wellness boutique, not pharmacy.	<i>Lifestyle goals</i>
2	Quiz 3 questions in 90 seconds. AI analyses goal + lifestyle + concern and selects the right bundle.	<i>Personalisation</i>
3	Routine Personalised bundle revealed with reasons. Morning / evening split. Each product explained.	<i>Personalisation</i>
4	Buy One-click add all three products to cart. Bundle pricing vs individual. Subscribe & save option.	<i>Category overlap</i>
5	Learn AI advisor available pre-checkout to answer questions. Builds purchase confidence.	<i>Personalisation</i>
6	Track My Routine page. Progress check-in after 4 weeks. AI adjusts recommendations if needed.	<i>Lifestyle goals</i>
7	Share Community page. Post results and routine. Browse others. Topic tags and trending content.	<i>Community</i>
8	Repeat Subscribe & save. AI flags when to reorder. New products suggested based on evolving goals.	<i>All four trends</i>

Every design decision maps to a specific Unilever consumer trend. The AI is not a feature — it is the backbone of the entire user journey.

Team roles & responsibilities

Eight team members across three active roles. Each role owns a specific layer of the GlowLab platform and is responsible for their section of the final presentation.

Role 1 · AI & Recommender System — Cassandra + Terry

AI Quiz logic

Design the 3-question quiz. Map every answer combination to the correct bundle. Write the “why this fits you” output text for each recommendation.

AI Advisor scripts

Script 10–15 realistic Q&As grounded in Unilever product data. Handle questions like “Is this safe to combine?” and “How long for results?”

Routine Builder design

Design the morning/evening routine output per bundle. Show what the My Routine page looks like after quiz completion.

Adaptive check-in flow

Design the 4-week check-in. What does the AI ask? How does it adjust the routine? Show a before/after recommendation change.

Presents: AI system slides (quiz, advisor, routine builder, check-in). Explains the “reduces cognitive load” argument. Answers how the AI actually works.

Role 2 · Data & Research — Tianne + Hafiz

Market research

Find 3–4 real stats on the wellness market, consumer decision fatigue, and AI in retail. Sources: Statista, Mintel, Unilever annual reports.

Consumer personas

Validate and deepen Sarah, Maya and Jess with real data. Add statistics that support each persona’s pain points.

Unilever brand research

Research Nutrafol, OLLY and Liquid I.V. — real ingredients, claims, price points, target customers. Makes bundle logic credible.

Critical reflection

Own the ethics slide. Research real AI risks in health retail — GDPR, algorithm bias, misinformation cases. Back every point with evidence.

Presents: Market evidence slides, validated personas with data, product fact-sheet for the bundles, and the critical reflection section. Makes the whole presentation credible.

Role 3 · Web Designer / Frontend — Alex + Kaiming + Krystal

Framer AI — website build Build the full GlowLab site in Framer AI. All five pages. Fill in the purple colour palette (#9F7AEA) and replace placeholder images.	DALL-E + Canva — visuals Generate lifestyle scene images (DALL-E) and product card banners (Canva AI). These fill Framer placeholders and appear throughout the PPT.
Screenshots + annotations Screenshot every finished page. Add annotation labels in Canva explaining each design decision — e.g. “Goal-based nav → reduces cognitive load → covers Trend 2.”	PPT visual design Own the look and feel of the final PPT. Consistent fonts, colours, layouts. All screenshots high quality and clearly labelled. This team owns the 20 visual points.
Presents: Website walkthrough with annotated screenshots of all five pages, DALL-E lifestyle imagery, Canva product banners, and the polished final PPT deck.	

S U M M A R Y

Role	Members	Owns	Assessment criteria
AI & Recommender	Kassandra, Terry	Quiz, advisor, routine builder, check-in	Content insight (40pts) — AI features
Data & Research	Tianne, Hafiz	Market research, personas, product facts, ethics	Content insight + Critical reflection (20pts)
Web Designer	Alex, Kaiming, Krystal	Framer website, visuals, screenshots, PPT	Visuals (20pts) + Clarity (20pts)
